KEY FEATURES

Full details on page 2

Solar power
The panel charges the battery summer and winter: no recharging or on-site maintenance.

Worldwide tracking
LTE/4G and Iridium® satellite: the position comes through even far from any mast.

Built to last outdoors
Ultra-tough glass-fibre composite housing, IP68 waterproof.

Tailored positions
Schedule from 1 point per day, or tracking on the move up to 1 point per second.

Zones and alerts
Customer, storage, port, parking zones: alert on entry, exit or prolonged stop.

Activity reports
Usage time, departures, stops, km or nautical miles, Excel or PDF export.

TECHNICAL SPECIFICATIONS

COMMUNICATION

Terrestrial network	Multi-network LTE/4G (LTE-M), roaming throughout Europe
Satellite	Iridium®, worldwide coverage
Mode	Hybrid: mobile network and satellite
Coverage	Fleet management and tracking worldwide
Positioning	GPS, GLONASS and Galileo

GEOLOCATION

Wake-up	On schedule, on movement or when entering / leaving a zone
Schedule	Programmable, at least 1 point per day
While moving	Up to 1 point per second
Settings	Positioning and transmission set independently
Configuration	By the operator, at any time, from the web platform
Distances	Kilometres or nautical miles, calculated from the map data

POWER

Power supply	Built-in rugged solar panel
Battery	3 Ah (Max version: 7 Ah), level shown on the platform
Without light	About 2'000 positions (Max version: 5'000)
Solar charging	Up to 500 positions per day in full sun, summer and winter
Maintenance	No on-site intervention needed

PLATFORM & ALERTS

Zones	Custom zones: customer, storage, port, parking...
Alerts	Zone entry or exit, prolonged stop
Activity	Usage time, departures and stops, distances travelled
Reports	Summary of your equipment's activity, Excel or PDF
Analysis	Charts and graphs: movement, speed, duration
Export	Archiving and export to your in-house software

GENERAL

Housing	Rugged, glass-fibre-filled composite, silicone gel seals
Protection	IP68 waterproof, for outdoor use
Subscription	Required, SIM card and server included

No need for solar? The battery-powered Activ'SK6

It moves from one vehicle to another without wiring: up to one month in normal tracking, and up to one year with a schedule of 2 positions per day, ideal for construction machinery.

Indicative specifications, subject to change depending on version.
