AUTONOMOUS GPS TRACKER · NO WIRING

Activ'SK6

Miniature battery-powered GPS tracker: it hides anywhere and moves easily from one vehicle to another.

Autonomous

- Goods
- Test drives
- Machinery
- Trailers

IP68
Waterproof, depending on version

Magnets
Fitted in seconds

1 year
With 2 positions per day

LTE/4G
Multi-network, all of Europe

KEY FEATURES

Full details on page 2

Ultra-discreet
Smaller than a pack of cigarettes: it hides in a box, on a pallet or in a vehicle.

No wiring
Rechargeable, it moves from one vehicle to another; battery level is shown in the app.

One month to one year
One month in normal tracking, up to one year with a schedule of 2 positions per day.

Wakes on movement
Its accelerometer wakes it at the slightest movement and saves the battery.

Remote settings
Positions on movement, on schedule or both combined, changeable at any time.

Anywhere in Europe
Multi-network LTE/4G, stores 2'000 positions if the network drops out.
